25X1A2g      2. [REDACTED] 3 March 1958 (TS) gave photographic coverage of factory No. 31 at Tbilisi. From this we were able to estimate the size of the factory. The photography also included the factory test field which showed parked on the ramp delta-wing fighter aircraft, probable FISHBED "B". This information has been very valuable.

25X1A2g      3. [REDACTED] also has furnished some information on the aircraft production facilities in Mukden, China. It is more difficult to evaluate these reports since there is very little information available from any other source. Never-the-less the following reports are regarded highly:
